

7<sup>th</sup> Grade ELA Assignments

Anne Threadgill

Anne.threadgill@hallco.org

Please use same print outs from Ms. Lowther's 7th grade Science Class

You can take information from 10 facts you have written down and create well thought out paragraphs utilizing all ten facts for **each** of the readings below. I challenge you to incorporate all 10 facts into ea. paragraph. If you need to write more than one paragraph to do so. I will give you extra credit towards your writing grade.

You will need to keep writing samples and return in folders. I have attached extra paper to each handout for reflection paragraph writing.

- A. **Gravity:** Please read & after completing work for Ms. Lowther answer:  
**How does gravity impact your life?**
- B. **Phases of the Moon:** Please read & after completing work for Ms. Lowther answer:  
**How are phases of the moon important?**
- C. **Eclipses:** Please read & after completing work for Ms. Lowther answer:  
**Explain in a well thought out paragraph what eclipses are.**
- D. **The Seasons:** Please read & after completing work for Ms. Lowther answer:  
**How do the seasons affect humans on earth?**
- E. **Earth's Interior:** Please read & after completing work for Ms. Lowther answer:  
**What makes up the earth's interior?**
